SUMMARY

Final-year B.Tech Computer Science and Engineering (Data Science) student with strong foundations in Python, data analytics, machine learning, and full-stack application development. Experienced in designing and developing AI-powered solutions using FastAPI, React.js, MongoDB, and Generative AI technologies through hackathons, academic projects, and self-driven initiatives. Skilled in exploratory data analysis, prompt engineering, retrieval-augmented generation (RAG), and intelligent automation to solve real-world problems. Passionate about building scalable software, continuously learning emerging technologies, and contributing to AI & Analytics solutions through analytical thinking, collaboration, and problem-solving.

SKILLS

Languages: Python, R, HTML, C

Databases: MongoDB, Firebase Firestore, SQL

Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Prompt Engineering, Machine Learning

Frameworks & Libraries: FastAPI, React.js, Tailwind CSS

Developer Tools: Git, GitHub, VS Code

Soft Skills: Leadership, Team Collaboration, Communication, Problem Solving

EDUCATION

Mar Athanasius College of Engineering, Kothamangalam — **CGPA: 8.41** — 2023–2027
B.Tech CSE (Data Science)

Thanbeehul Islam Higher Secondary School — State Board: 96% — 2021–2023

Thanbeehul Islam Higher Secondary School — State Board: 98% — 2021

PROJECTS

OmniMind – AI Personal Digital Twin

- **Tech Stack:** Python, FastAPI, React.js, MongoDB, Gemini API, GitHub API, JWT.
- Developed an AI-powered career intelligence platform that analyzes resumes, GitHub repositories, and projects to build a personalized digital twin.
- Implemented LLM-based skill assessment, ATS scoring, career recommendations, and adaptive interview generation.
- Built scalable REST APIs with FastAPI and designed a responsive React dashboard for career analytics and progress tracking.

Atlas – AI Software Architect

- **Tech Stack:** Python, FastAPI, React.js, MongoDB, Gemini API, Mermaid.js.
- Developed an AI-powered platform that transforms project ideas into software architecture, database schemas, REST APIs, and sprint plans.
- Integrated Generative AI to automate requirement analysis, system design, documentation, and deployment recommendations.
- Built scalable backend APIs and an interactive React interface for architecture visualization and project planning.

CyberGuard – AI Digital Behavior Risk Analyzer

- **Tech Stack:** Flutter, Dart, Firebase, Firestore, Machine Learning.
- Developed a mobile application to analyze digital behavior and estimate cybersecurity risk.
- Implemented behavioral risk scoring and personalized security recommendations.
- Visualized real-time risk trends using Firebase services.

LEADERSHIP AND EXPERIENCE

GenAI Powered Data Analytics Job Simulation | Forage | Jul 2026

- Completed a virtual job simulation focused on AI-powered data analytics and business problem-solving.
- Performed exploratory data analysis and generated actionable insights from business datasets.
- Applied Generative AI techniques to support data-driven decision-making and communicate findings effectively.

Participant – .hack(); 2025 — **Aug 2025**
IEEE MACE SB — *MACE, Kothamangalam*

- Participated in the .hack(); 2025 hackathon conducted by IEEE MACE SB.

Volunteer & Hospitality Lead — **2025 – Present**
College Technical and Cultural Events — *MACE, Kothamangalam*

- Supported hospitality and volunteer coordination for college technical and cultural events.

CERTIFICATIONS

- **NPTEL – The Joy of Computing Using Python** (Elite)
- **BRAIN WAVE State-Level Ideathon – ProfSummit 2025** (Participant)
